

EDVENTURE MODULE TOPICS

(15min outside)

This Edventure is stackable. If you want to do two or three topics, we can do topics back to back up to 3. Please indicate how many topics you want in your request form. For groups larger than 50 students, consecutive programs or simultaneous programs may be an option.

Elementary School (K – 5th)

Wildly Fun Adaptations

Students will learn how animals' claws, camouflage and other cool adaptations help them get what they need to survive in the wild.

Animal Classifications

From mammals to reptiles, some animals are alike, and some are very different. Students will learn animal classes and how they can be grouped based on their physical characteristics.

Habitat/Adaptations

Every animal is suited to live in its home! Students will learn about different habitats and the wildlife that live there.

Exhibit Design*

Discover how zoo habitats come to life! Students will learn how animals' needs, enrichment, and conservation shape the spaces our animals live in.

Predator vs Prey (3rd-5th)

Some animals hunt and some animals hide. Students will explore the unique ways predators and prey survive and why both are important to the environment.

Zoo Careers (3rd-5th)

Students will discover it takes many different jobs to run a zoo and learn how to start the journey to a zoo career themselves!

Preschool (2-5yrs) (limited to 25 students per program)

Action Animals

Come share a quick story book with our staff and act out the animals in the story. Students will discover some unique ways animals in the story move around.

*Are you using the Knox County School Exhibit Design Career Module?

Add our Exhibit Design Edventure Program to further engage your students.
